“As one of today’s time-binders, you live in the present and learn about the past for the sake of your future.”

JOURNEY INTO THE FUTURE: Today’s Time-Binders Shaping Tomorrow

GREGORY SAWIN

“You recognize that you are one link on the long chain of generations … You can hear the echoes of history and the generations that walked before you ...”

— DAVID M. FETTERMAN

THE SAGA of the human race has been the struggle to survive, as individuals and as cultures. Our ancient ancestors’ spears, bear skins, and fire were not their only tools for staying alive. They created languages that served as essential tools for communicating, thinking, cooperating, and solving problems. These language-oriented survival skills proved just as important as the skills for making stone tools.

Universally, on different continents in the distant past, our ancestors created and developed unique languages that made them powerful time-binders. Older generations passed on to younger generations the survival skills, beliefs, customs, and technical know-how necessary for maintaining and improving their ways of life.
As one of today’s time-binders, you live in the present and learn about the past for the sake of your future. I believe that your best destiny is to become a skillful time-binder who eagerly —

- listens  
- learns  
- discovers

- reads  
- reasons  
- explores

- writes  
- communicates

Then you will have the power to contribute your own expertise and efforts to the ever-increasing collective wisdom and accomplishments of the human race in the quest to build a brighter future.

I expect that the present rising tide of time-binding benefits will become a tidal wave of human potential realized if more people in our global community will apply the methods of general semantics — especially the young time-binders in junior high school, high school, and college.

Use the tools of general semantics to tune up your life. Train yourself in awareness of the abstracting processes involved in perceiving, thinking, communicating, and time-binding.

Join the planetary team of time-binders who are working to solve problems and create a better world for humanity today and for generations in the future.
